## Discover a new feeling of home: high-quality timber internal doors

Our home is the centre of our life, our safe haven, our oasis of well-being.

As a family business, this spurs us on to provide products made in Germany to give you that special feeling of being at home. Our high-quality timber internal doors contribute to this and provide your home with that extra cosy feeling.

Whether classic or modern, white lacquer or beech, with glass elements or stainless steel embellishments – Hörmann offers you the timber internal door that suits you and your furnishings perfectly.

“A good reputation must be earned.”

August Hörmann

In keeping with the tradition started by the company's founder, the name Hörmann delivers brand name quality with extensive product expertise. The family business has over 80 years of experience as a construction component specialist and sees itself as your partner from the very beginning of building and renovation projects. It's no surprise that Hörmann is one of Europe's most successful internal door providers. This makes a Hörmann internal door a reassuring purchase.

## 1 Quality products from Germany

The door and frame design are developed by Hörmann in-house. The doors are manufactured based on quality, environmental, energy and workplace safety management guidelines acc. to DIN EN ISO 9001, 14001, 50001 and BS OHSAS 18001 in a modern German factory. In addition, our highly qualified employees work intensively on new products, **continual further developments and improvements to details**. Patents and unique products on the market are the result of this.

## 2 Internal doors for generations

We are convinced of our products and our uncompromising quality assurance. You can enjoy a Hörmann internal door for years to come **because you are literally choosing a “door for life”**.

## 3 An eye on the future

Hörmann is setting a good example. This is why the company obtains **100 % of its required energy from green sources**. At the same time, many tonnes of CO<sub>2</sub> are saved each year thanks to the introduction of an intelligent and certified energy management system. For example, using block heating stations saves 1,400 t CO<sub>2</sub>. Furthermore, the company uses CO<sub>2</sub>-neutral printing for dealer price lists and post. And last but not least, Hörmann offers products for sustainable construction.

## 4 Diverse product offering

### Door leaf and frame combinations to suit every taste

Hörmann has the appropriate door version for your individual decorating style. Fans of the classic look prefer the rebated door leaf and a frame with rounded edges **1**. Those who like clear lines select the same combination with angular edges. The flush-closing door leaf and a frame with angular edges are characterised by a nearly flush-fitting appearance and emphasise a modern home design **2**.

### High-quality door leaf

The timber internal doors are available with four different door leaf inserts – from a simple honeycomb insert up to a high-quality solid chipboard.

## 5 Triple room concepts: ConceptLine

### ■ NEW

Well thought-out and versatile: the ConceptLine doors offer **new kinds of design possibilities**. Combine the high-quality ultra matt, gloss (high-gloss) and slate surface finishes with the Traffic white, Light grey and Anthracite grey colour variants. Find out more details about the low-maintenance and robust surface finishes on page 18.

## 6 All-glass doors with nano-coating

### ■ NEW

Do you want a **light-flooded home**? Then our all-glass doors are the perfect choice for you. Apart from its elegant door appearance, the GlassLine also convinces with regard to ease of care: all styles with sand-blasted glass are equipped with nano-coating for fewer fingerprints.

### Styles matching Groove

Matching all-glass doors are available for the DesignLine Groove door styles for the perfect mix of timber and glass doors.

## 7 Steel profile frame VarioFix

For the new Hörmann steel profile frame VarioFix, wall tolerances of up to 20 mm are no longer a problem: The adjustable decorative rebate easily compensates for different wall thicknesses during renovations and new construction projects. As **easy to fit as a timber frame**, the steel frame is additionally distinguished by its long service life and attractive design. Only VarioFix offers high resistance and an elegant shape without visible foldback coupled with the fitting principle of timber frames. For further information, see pages 58 – 61.

## 8 Extremely impact-resistant: Duradecor surface

The high-quality surface will delight you: Duradecor features **maximum shock resistance that is 48 % better** than the average of the tested CPL surfaces from other manufacturers. It is also resistant, low-maintenance and heat-resistant allowing you to enjoy your door for years to come.

## 9 Beautiful and robust: 4Protect edge protector

### ■ NEW

Our timber internal doors with angular edges and Duradecor white lacquer, Light grey and Anthracite grey surface finishes are **equipped as standard with the high-quality 4Protect edge protector.**

The quadruple edge protection benefits from impressive features:

1. High impact resistance
2. High wear resistance
3. High scratch resistance
4. Perfect joint-free look, meaning that unlike conventional doors, no visible gaps disturb the high-quality appearance of the door.

This makes your timber internal doors more resistant against everyday stress so you can enjoy them for many years to come.

## 10 See and touch: Duradecor texture

The finely textured surfaces allow you to feel what you see. **A wood grain texture is embossed into the door leaf**, making the characteristic wood structure of the Duradecor texture surface tangible. In the synchronous texture, the wood grain matches the printed surface finish exactly. For the new brushed surface structure, the texture is matched to the brushing in the decor design.

## 11 Barrier-free living: door operator PortaMatic

Are you physically disabled or would you simply like more convenience? Then equip your internal doors with the innovative door operator PortaMatic. This allows you to **automatically close and open** the doors via a hand transmitter or button, improving your quality of life. For more information, see from page 54.

## Plain, chic, timeless

Would you like a timelessly elegant internal door with a welcoming character for your home? Then the door models in the BaseLine series offer you the perfect selection. The solid door leaf in a flush or rebated version – combined with your preferred surface – harmonises wonderfully with your style. This allows you to create a comfortable and relaxing atmosphere.

All BaseLine timber internal doors are available in five high-quality surfaces:

- Duradecor smooth  
Particularly impact-resistant in 2 colours and 3 timber designs
- Duradecor texture  
Natural character in 9 timber designs
- Duradecor synchronous texture  
Perfectly replicated in 3 timber designs
- Real wood veneer

## The combination wonder for individual design possibilities

The ConceptLine door models underline a modern and elegant design style with their subtle Traffic white, Light grey and Anthracite grey colours and the three high-quality ultra matt, gloss (high-gloss) and slate surfaces.

- Ultra matt

The particularly elegant silk matt Duradecor surface finish meets the highest demands both visually and haptically. Ultra matt combines the high resistance to fingerprints and soiling with a previously unattainable matt finish.

- Gloss

The elegant high-gloss surface in a crystal look creates special light effects and reflections.

- Slate

The contrast of matt and gloss on the raised texture makes this surface a real eye-catcher in your home.

## Three times three possibilities

With the ConceptLine you can stylishly realise individual room concepts. Combine the gloss, ultra matt and slate surface finishes with the Traffic white, Light grey or Anthracite grey colours according to your wishes. They are distinguished by their quality, ease of care and robustness.

An elegant, ultra matt frame provides the design basis for all doors in the different surface finishes.

Which combination best fits your home and fulfils your demands? Discover the beautiful ConceptLine models and all the combination options on the following pages.

## Discover your dream door

Create the door of your dreams with DesignLine. Whether style elements such as stainless steel embellishments, recessed grooves or modern all-glass doors, whether real wood veneer or paint – the DesignLine offers a variety of modern door styles which you can use to make your home cosy and attractive – while also showing a sense of style. The DesignLine internal doors are available in various versions.

- Plain  
With flush-fitting embellishments
- Steel  
With surface-mounted embellishments
- Stripe  
With embossed grooves
- Inlay  
With flush-fitting real wood pilaster strips
- Groove  
With recessed grooves
- GrooveGlas  
Sand-blasted with silkscreen, matching the Groove timber door styles
- Rail  
Timber and glass combinations matching the DesignLine timber door styles

## We are dedicated to detail

Subtle details such as embellishments and grooves make your timber internal door an eye-catcher.

For the Plain style, embellishments with a stainless steel look are inlaid flush-fitting in the door leaf.

Surface-mounted embellishments in stainless steel on the door leaf give the Steel styles timelessly elegant contours.

The Stripe 15 style with embossed grooves offers you a subtle design with that certain something.

The Steel, Plain and Stripe styles are available in all decors of the extremely impact-resistant Duradecor\* surface finish.

The right timber glass door rail is available for all styles.

## Harmonious combinations

A small detail with a major effect: the inlaid pilaster strips in Maple or Beech are the highlight of the door style Inlay 26. They fit flush to the door leaf, resulting in a harmonious overall view. The styles Inlay 2 and Inlay 12 in alternating grain patterns provide the door leaf with a unique look. All Inlay styles are available in the real wood veneers Maple, Beech and White Oak.

## The icing on the cake

Recessed grooves are the special feature of the Groove door styles. They are precision milled in the door leaf and the entire door is then coated with high-quality paint. This results in elegant door styles with white surfaces that are a highlight in any room.

The door leaf version with rounded edges showcases the grooves in a particularly elegant manner.

5 mm wide, recessed grooves in the Groove door styles

**Groove 15**  
**White lacquer**  
Rebated version

## Harmonious combination

For the perfect combination of timber and glass, the Groove styles are available with matching styles as a glass door with single-pane safety glass. This means that the horizontal lines of the sand-blasted glass doors run exactly at the same height. For glass doors with silkscreen these lines are also adapted to timber doors in the standard sizes. For all other dimensions, the door leaf is visually adjusted. The design of the timber door may differ.

Whatever variants you choose: we guarantee a harmonious and elegant overall appearance.

You can find further information on the glass finishes on page 42.

## For fans of the classic look and design aficionados

Do you want a classic look that's also modern? Then our timeless DesignLine styles are the perfect choice for you. Discover your favourite DesignLine door for the perfect country house style.

- Georgia  
Exclusive door styles with inserted profile strip
- Carolina  
Inexpensive door style with embossed profile
- Virginia  
High-quality panel doors in an elegant design

## High-quality details, elegant appearance

For the perfect country look, we recommend the exclusive Georgia door styles. The high-quality profile strip is inlaid into grooves in the door frame using traditional carpentry techniques, lending these styles an elegant appearance. The Georgia door styles are available in all Duradecor\* and lacquer surface finishes as well as real wood veneer in White Oak.

## Beauty that is more than skin deep

The Carolina doors have a clean, classic look. The panel frames are created by an embossed profile in the door leaf. A paint coating on a white base plate gives the styles a smooth, brilliant colour surface.

## Welcome to the light-flooded home

Glass doors are not only upmarket and chic, they contribute to an open and friendly design for your home and lend each room a particular charm. Whether classic or with playful details – find the suitable glass door from our wide range that will turn your home into an oasis of well-being. All-glass doors are optionally available as a leaf door with a timber frame or a VarioFix frame as well as a sliding door with single-pane safety glass. The glass doors are equipped with different glass finishes depending on the style:

- Silkscreen  
Particularly scratch-resistant surface, easy to clean and resistant to soiling
- Sand-blasting  
Matt surface finish with nano-coating for fewer fingerprints
- Laser technique  
Creates fine details and shading
- Fluted glass  
Particularly elegant due to fine V-groove

For further information, please see page 42.

## High-quality glass finishes

### Silkscreen

For the silkscreen procedure a ceramic Satinato look is baked into the glass resulting in a sealed, resistant surface finish. Silkscreen is characterised by the following features:

- Particularly scratch-resistant surface, comfortable feel
- Easy to clean, resistant to soiling
- Resistant to stress

### Sand-blasting

Light falling through sand-blasted glass doors appears relatively soft, i.e. somewhat "dimmed". Individual style requests can also be fulfilled with this technique. Characteristic for sand-blasting:

- Subtle, matt surface finish
- Soft light
- Easy to clean thanks to nano-coating for fewer fingerprints

### Laser technique

With this procedure, a small part of the glass is melted with a laser. This causes little dots that appear white due to light refraction. The result is fine details and shading on the glass. This is what distinguishes the laser technique:

- Sealed, resistant surface finish
- High durability
- Shimmering light effect

### Fluted glass

The fluted glass on the glass door is created by a fine V-groove. A clear or satin-finished glass is used depending on the preferred opaqueness. This is what distinguishes the fluted glass:

- Special design
- Tangible feel
- Extraordinary play of light created by the prismatic effect

## A feeling of security for you and your family

Many TechnicLine styles are available as secure apartment entrance doors, and nearly all BaseLine (without glazing cut-out) and DesignLine door styles are available as heavy-duty fire-rated doors. In addition, you have the option of equipping your timber door with special functions, such as a wide-angle camera. This gives you a feeling of security, especially if you are home alone.

Apartment entrance door with climatic class 3 and acoustic rating category 2

- BaseLine without glazing cut-out
- DesignLine: Steel, Plain, Groove, Inlay, Georgia (with contour-milled profile strip)

## Door leaf versions

- Rebated angular
- Rebated round
- Single-leaf

## Version WAT Klima 3 SK2

- Climatic class III
- Acoustic rating category 2 (37 dB)

## Version WAT Klima 3 SK3

- Climatic class III
- Acoustic rating category 3 (42 dB)

## Version WAT Klima 3 SK2 RC 2

- Climatic class III
- Acoustic rating category 2 (37 dB)
- Security equipment RC 2 (3-point locking with stainless steel lock cover)

Optional protective fitting ES 2 for RC 2 security equipment

Additional locking at bottom in the optional RC 2 security version

Optional VX hinge for increased security

# T30 fire-rated doors

## Door styles

- BaseLine without glazing cut-out

## Door leaf versions

- Rebated angular
- Rebated round
- Single-leaf and double-leaf (break-in-resistant RC 2 only for single-leaf)

## Version T30 Klima 2

- T30 fire-retarding (DIN 4102-4)
- Climatic class II (DIN EN 12219)
- Single-leaf: slide rail overhead door closer HDC 35
- Double-leaf: slide rail overhead door closer TS 5000 ISM
- Fire-proof plastic lever handle with short escutcheon

## Version T30 Klima 3 SK 2 RS

- Fire-retarding (DIN 4102-4)
- Smoke-tight (DIN 18095, DIN EN 1634-01)
- Acoustic rating category 2 (37 dB)
- Climatic class III (DIN EN 12219)
- Single-leaf: slide rail overhead door closer HDC 35
- Double-leaf: slide rail overhead door closer TS 5000 ISM
- Fire-proof plastic lever handle with short escutcheon

## Version T30 Klima 3 SK 2 RS RC 2

- T30 fire-retarding (DIN 4102-4)
- Smoke-tight (DIN 18095, DIN EN 1634-01)
- Acoustic rating category 2 (37 dB)
- Climatic class III (DIN EN 12219)
- Break-in-resistant RC 2 (DIN EN 1627)
- Single-leaf: slide rail overhead door closer HDC 35
- Fire-proof plastic lever handle with short escutcheon
- 3-point locking with stainless steel lock cover

Slide rail overhead door closer HDC 35

Fire protection lever (profile cylinder not included in the scope of delivery)

VX hinge

## Optional accessories

The door styles of the TechnicLine can be additionally equipped with optional accessories. Whether spyhole, e-spyhole, electric strike or motor lock, our optional extras fulfil all your requirements for safe and comfortable living.

Spyhole

A must for more safety: With a spyhole, you can see who is standing in front of your door at any time without having to open it.

E-spyhole with LCD display

Looking through the spyhole often poses problems for children, people who wear glasses or the elderly. The wide angle camera is a convenient solution for seeing exactly who is outside your door.

Electric strike

With the electronic strike catch, you can conveniently open your door via a switch inside the home.

Motor lock

Practical, convenient and safe – the motor lock automatically locks your entrance door.

## Open and close doors effortlessly

With the Hörmann PortaMatic door operator, you can open and close your timber and steel internal doors automatically via hand transmitter or button. Whether you are physically disabled or would simply like more convenience – this technology will make your everyday life easier. The door operator PortaMatic features not only an array of functions and settings, but also minimal power consumption. In addition, the PortaMatic is up to 25% cheaper than similar door operators.

For additional information, consult the Door Operator PortaMatic brochure.

### Senior-friendly residences

Would you like to stay mobile despite physical limitations? The PortaMatic operator for internal doors improves your quality of life by helping you move about your home unaided.

### Convenient living

You can now carry full trays, heavy crates of beverages or your shopping bags into your rooms unhindered. Even if you don't need the automatic door operator PortaMatic for health reasons, you will never want to do without this convenience again – we guarantee it!

### Barrier-free working

Barrier-free working already plays an important role and will continue to gain importance in the future. The PortaMatic door operator can be integrated into all non-public areas at your workplace, thus ensuring more convenience.

### Hygienic door operation

In office buildings, the risk of infection among employees is especially high on doors leading to the lavatory. In combination with a non-contact switch, the PortaMatic door operator provides reliable protection from germs and bacteria, giving you a sense of security.

## Flush version

The flush closing door leaf offers an exclusive door appearance with a practically seamless transition to the frame and emphasises modern home design.

### Lock

Standard: deadlock, Class I, lock cover in nickel silver

Optional: magnetic latch lock

### Hinges

Guide roller V 7888 WF 3D (standard), only for timber frames

Concealed 3D hinge DX 61 (optional)

## Rebated version

The rebated version is available in two edge versions. The version with angular edges creates clear contours while the rebated door leaf with rounded edges provides a harmonic Softline look.

### Lock

Rebated door with angular edge

Standard: deadlock, Class I, lock cover in nickel silver

### Hinges

Guide roller V 3420 WF (as standard)

Guide roller V 4426 WF (optional)

3D hinge VX 100-18 (optional)

Concealed hinge Pivota FX 2 60 3D (optional)

## The robust steel frame VarioFix

In addition to the standard timber frames, all our internal doors are also available with the steel frame VarioFix. It is the ideal solution for apartment entrance doors and internal doors in the home and project sector where high resistance and durability are necessary.

The VarioFix frame harmonises perfectly with other timber frames due to the frame face of 55 mm on both sides. This way, you can also use doors with different frames in one room or house.

For the steel frame VarioFix, wall tolerances of up to 20 mm are no problem. The adjustable decorative rebate easily compensates for different wall thicknesses during renovations and new construction projects.

The VarioFix frame is available in Traffic white RAL 9016 to match our door leaves in Duradecor white lacquer and paint as well as in RAL to choose.

The frame face of 55 mm on both sides of the VarioFix frame (fig. left) harmonises perfectly with timber frames (fig. right).

The VarioFix frame is especially robust and can withstand "accidents" with toy cars or run-ins with the Hoover.

The VarioFix frame is also suited for apartment doors with RC 2 security equipment and acoustic insulation.

# VarioFix: the steel frame with many benefits

## Especially resistant to damage **1**

The robust VarioFix frame can also take a collision with a toy car or your Hoover. In such cases edges on timber frames can be damaged or even chipped.

## Resistant to cleaning water **2**

The VarioFix frame is the perfect solution for rooms with tiled floors. Thanks to the high-quality galvanization, even cleaning water cannot damage the frame. With timber frames there is a danger that the bottom frame edge will swell or that it must be sealed with an unattractive silicone joint.

## Invisible mitre cut **3**

For the powder-coated steel frame VarioFix, the corner joints feature high-quality welding and a flush polish, meaning there are no visible mitre cuts in the frame corners, in contrast to timber frames.

## Uniform gap dimension for flush-closing doors **4**

Due to the stable steel construction, the VarioFix frame cannot warp after fitting. This guarantees a uniform gap dimension for flush-closing doors and ensures a harmonious and elegant door appearance.

## Our space-saving marvels: sliding doors

Sliding doors open up new possibilities for ideal use of your living space. Hörmann offers sliding door solutions for every living situation. All door styles in BaseLine and DesignLine as well as in GlassLine are available as sliding doors.

With the brush on the door leaf (figure on left) and the optional inlet seal in the frame (figure on right), Hörmann sliding doors offer optimal protection against odours, noise and draughts – for even more comfort in your own home.

### Sliding door box type A, for double-leaf sliding doors

When fitted in front of the wall, the door leaf slides on two guide rails mounted in the sliding door box. When fitted running within the wall, the guide rails are fitted in an on-site door pocket in the wall. This eliminates the sliding door box. The wall opening is concealed by the frame.

Running in front of the wall: frame, guide rail panelling and door leaf form a harmonious unit

Running within the wall: door leaf is inserted into an on-site door pocket in the wall, the frame completely conceals the wall opening

### Sliding door box type C, for single-leaf sliding doors

In addition to the horizontal side guides, this version also has a vertical stop fitted in the frame. This makes it possible to also have locking functions or other optional extras such as an inlet seal for better protection against odours, noise and draughts.

Running in front of the wall, opening towards the left

Running within the wall, opening towards the left

### Sliding door system Slide Compact for single and double-leaf sliding doors

With this system, the door leaves slide in a guide rail profile. The profile in a stainless steel colour can be fitted both in front of the wall and on the ceiling. For a door leaf weight of up to 60 kg, the Slide Compact system is equipped with a SafeClose in order to gently close the door leaves.

Running in front of the wall, opening towards the left

Running in front of the wall

Slide Compact with glass door

## Glazing cut-outs

With our selection of glazing cut-outs, you can take your favourite style and make the personalised door of your dreams. Glazing cut-outs are available in the glazing of your choice.

## Side elements and transom lights

Side elements and transom lights flood your living spaces with light for a special flair. While side elements visually enhance the door sets, transom lights emphasise the room height. Top panels underscore the ceiling-high appearance of the door set.

## Glazing cut-outs

All door styles in the DesignLines Georgia, Vermont and Carolina are available with glazing in the upper panels.

## Side elements

(lintel-high)

Single-leaf, 1 side element

Single-leaf, 2 side elements

Double-leaf, 2 side elements

## Transom lights

(ceiling-high)

alternatively also with transom  
light

Double-leaf, 1 transom light

Double-leaf, 2 side elements, 1 transom light

## Handle sets to suit every taste

Whether classic or modern, angular or rounded – Hörmann offers you a wide range of elegant and high-quality lever handle sets for the BaseLine, ConceptLine, DesignLine and TechnicLine door models.

For an especially elegant door appearance, all lever handles are optionally available in a flush-fitting Planar variant.

# Beautifully shaped handles that are simply impressive

Personalise your sliding door with the handle of your choice. We offer handles for glass doors and timber doors that tastefully complete the look of your sliding door.

## Handles for sliding doors

Handle recess, oval, matt stainless steel (for timber doors)

Handle recess, round, matt stainless steel (for timber doors)

Handle recess, angular, matt stainless steel (for timber doors)

Handle recess, round, closed, matt stainless steel (for glass doors)

Handle recess, angular, closed, matt stainless steel (for glass doors)

Handle bar pair Basic, round, Ø 25 mm, 400 mm length, matt stainless steel

Handle bar pair Basic, angular, 500 mm length, matt stainless steel

Handle bar pair Combi, push bar with one-sided handle plate, 400 mm length, matt stainless steel

For sliding doors that run within the wall, you can conceal the door leaf completely in the wall with a trip handle. The handle springs out at the press of a button, allowing you to close the door.

# Fittings for all-glass doors

For all-glass doors you can choose between a round and an angular fitting set, which can each be combined with one of eight elegant stainless steel lever handles. Each variant is available in a lockable and non-locking version.

# Benefit from impressive performance features: Duradecor

With regard to ease of care and robustness, Duradecor cannot be beaten – it is almost as durable as a kitchen countertop.

- 48 % more impact-resistant than the average of the tested CPL surfaces from other manufacturers
- Hygienic and low-maintenance
- Strong antistatic and colour-fast properties
- Resistant to heat and abrasion
- Stands up to normal household fluids, pastes, etc.
