JOINERY CO.

MAKING SPACE MORE VALUABLE

The Flooring Collection

Howdens Professional Continuous Light Stone Tile

## The Flooring Collection

### About Us

Howdens Joinery offers a range of joinery products and kitchens specifically designed for today's homes. We are a trade only business that has been selling to trade professionals since 1995. We believe that only experienced, qualified builders and joiners should install our products.

### Our Product Range

We offer a variety of flooring to suit every style and budget, from solid oak and laminate flooring to natural stone effect laminate tiles. Our range includes a choice of colours, such as oak, bamboo, American pecan and walnut, as well as different finishes, from timber effect to limestone and slate. Our selection also provides products suitable for a wide range of applications throughout the home and in commercial properties.

Howdens also supplies a variety of flooring accessories for a professionally fitted floor, including underlay, damp proof membrane, flooring spacers, colour-matched scotias, pipe roses and floor profiles.

### CAD Planning & Design Service

Howdens Joinery offers a free Computer Aided Design (CAD) planning and design service that features our full range of flooring. Contact your local trade professional who will arrange for one of our designers to come out and measure your room. They will discuss your requirements and our complete product offering.

### Our Commitment

We work closely with our suppliers to ensure that the items we purchase come from sustainable renewable resources and are produced in a socially responsible way. Howdens Joinery has successfully achieved the Forest Stewardship Council® (FSC®) and the Programme for the Endorsement of Forest Certification™ (PEFC™) Chain of Custody certificates, which apply to a number of products as indicated in this brochure by the FSC® logo or **F** and the PEFC™ logo or **P**. The Chain of Custody certification means there is an unbroken and documented chain of ownership all the way from the forest, via the mill, the importer, the manufacturer and the supplier to the end user. Our full environmental policy is available on request.

### UK Manufactured

A selection of flooring and flooring accessories are manufactured in the UK as indicated in this brochure by the **UK** or **UK MANUFACTURED** logo.

To find out more, contact your local builder or visit [www.howdens.com](http://www.howdens.com)

Our complete range of flooring includes solid wood, timber laminate and tile laminate, as well as a variety of flooring accessories for a professionally fitted floor.

Kitchen

Hallway

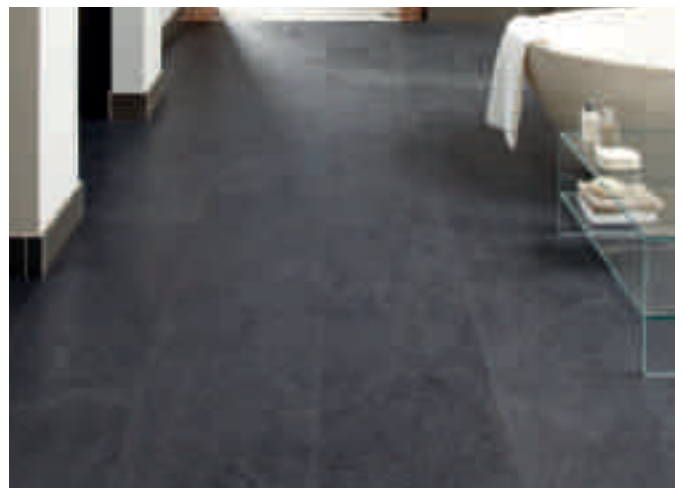

Living Room

Dining Area

Bedroom

Bathroom

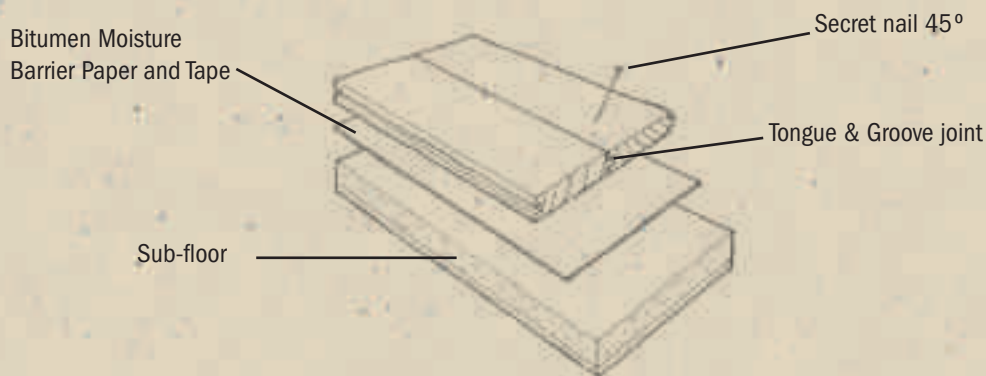

## Howdens Solid Oak and Solid Bamboo Flooring

For those who demand a high quality, natural product, our Solid Oak flooring is the perfect choice. Manufactured from a B/C Grade timber, it is resistant to stains and comes with a 15 year finish and wear guarantee. Alternatively our Solid Bamboo flooring offers a 25 year structural guarantee and a 5 year finish and wear guarantee.

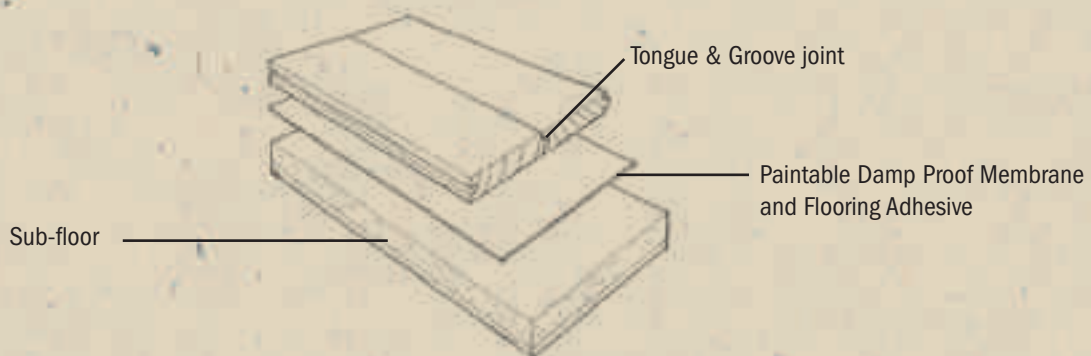

Solid Oak and Solid Bamboo boards can be: secret nailed to timber sub-floors or glued with suitable adhesive (SDH3181, SDH3182 and SDH3176) to solid, dry, flat screeded or concrete sub-floors. Both are fully restorable and will last for many years.

Not suitable for use with underfloor heating.

### Recommended fitting method for timber sub-floors - Secret nail

### Recommended fitting method for concrete sub-floors - Glue down

#### Paintable Damp Proof Membrane – SDH0931

Is suitable for use with Howdens Solid Oak and Solid Bamboo floorings on cement based sub-floors. Paintable Damp Proof Membrane is used as a moisture barrier on sub-floors when Damp Proof Membrane (SDH0910) is not suitable. Flooring adhesive can be applied on top of the Paintable Damp Proof Membrane.

#### Bitumen Moisture Barrier Paper – SDH0932

Required when fitting Howdens Solid Oak or Solid Bamboo flooring to a timber based sub-floor. Use in conjunction with Bitumen Moisture Barrier Paper Tape (GAR0410) as the bitumen within the paper forms a seal around the nail.

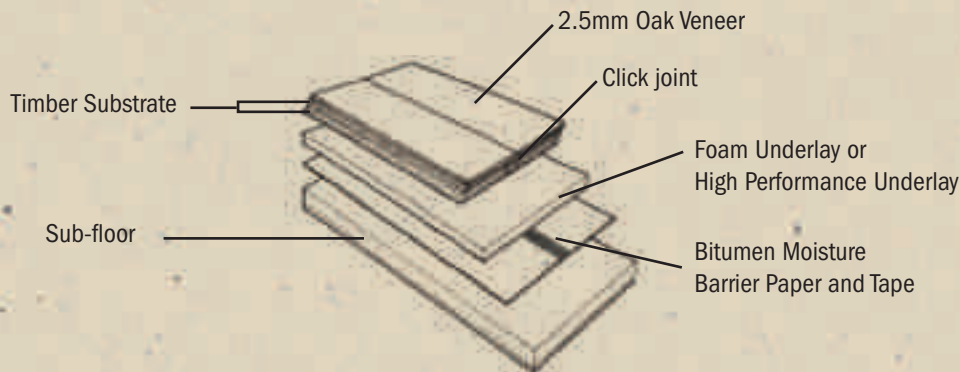

## Real Wood Flooring

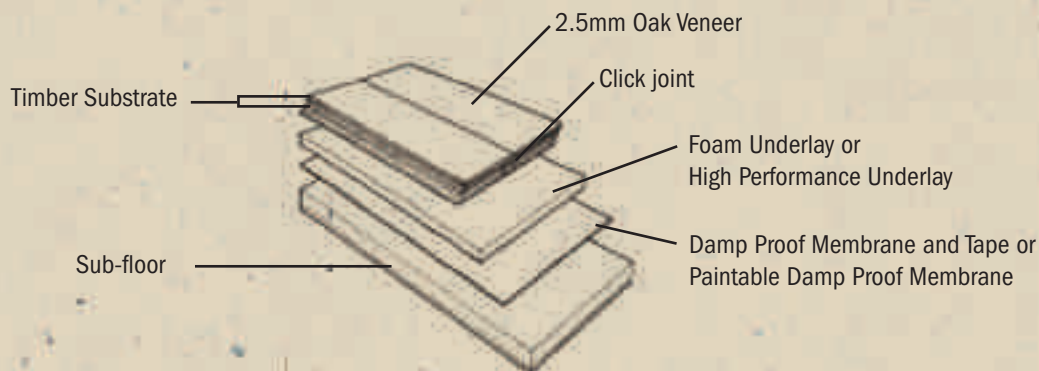

Real Wood (engineered) floors are popular due to their resistance to expansion and contraction from temperature change and moisture.

Engineered Wood is produced using oak veneer layers with each layer oriented in different directions for strength. The top layer can be sanded and re-lacquered up to 3 times. Subject to fitting instructions, Real Wood flooring can be used in conjunction with underfloor heating.

### Recommended fitting method for timber sub-floors - Floating

### Recommended fitting method for concrete sub-floors - Floating

Flooring underlay is essential for use with a floating floor. It provides a cushion for the flooring to sit on, and will provide thermal insulation and reduce the emission and transmission of sound.

#### Foam Underlay – SDH0900

Popular because it is easy to fit, it also has an excellent thermal insulation. Foam Underlay can be used in conjunction with Damp Proof Membrane (SDH0910), Paintable Damp Proof Membrane (SDH0931) or Bitumen Moisture Barrier Paper (SDH0932). Sheets must be joined together using Multi-Purpose Tape (SDH0930).

#### High Performance Underlay (XPS) – SDH0909

This underlay has many benefits including excellent levelling properties, compression strength and impact noise reduction. It is also lightweight and easy to handle. It can be used in conjunction with Damp Proof Membrane (SDH0910), Paintable Damp Proof Membrane (SDH0931) or Bitumen Moisture Barrier Paper (SDH0932).

#### Bitumen Moisture Barrier Paper – SDH0932

Required when fitting Real Wood flooring on a timber based sub-floor. Use in conjunction with Bitumen Moisture Barrier Paper Tape (GAR0410).

#### Damp Proof Membrane – SDH0910

It can be used on stone or concrete sub-floors. Details of where and how to use Damp Proof Membrane can be found in the relevant flooring installation guidelines. Use in conjunction with Multi-Purpose Tape (SDH0930).

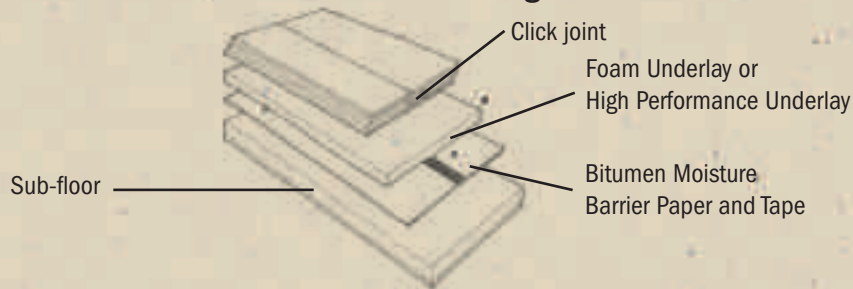

#### Paintable Damp Proof Membrane – SDH0931

Is only suitable for use with Howdens Real Wood flooring on concrete based sub-floors. Paintable Damp Proof Membrane is used as a moisture barrier on sub-floors when Damp Proof Membrane (SDH0910) is not suitable.

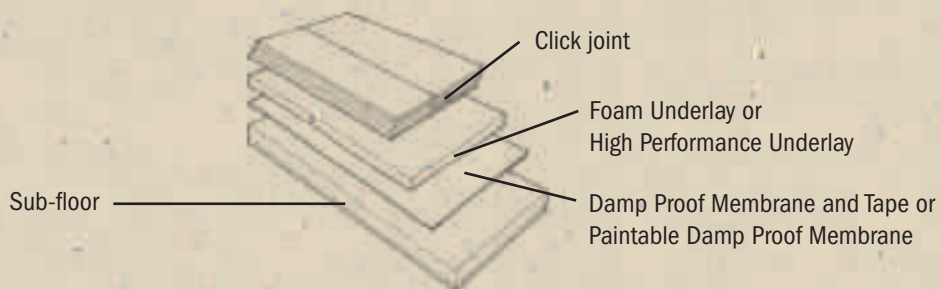

## Laminate Flooring

Howdens quality laminate flooring has a tried and tested locking system for fast, secure installation. It features a high density fibreboard (HDF) core and edge sealing, which ensure the absolute minimum amount of moisture is absorbed. All our laminate flooring is suitable for use with underfloor heating.

### Recommended fitting method for timber sub-floors - Floating

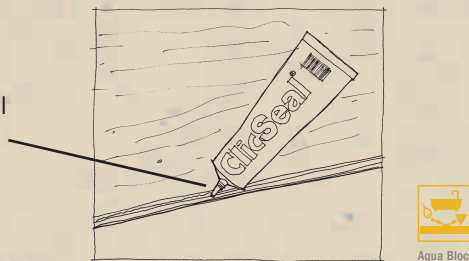

### Recommended fitting method for concrete sub-floors - Floating

### Aqua Block

On selected ranges, our Aqua Block specification makes the flooring suitable for bathrooms and other areas prone to high moisture levels (excluding wet rooms), if the joints are sealed using Flooring Joint Sealer (SDH0099). Standing water should not be left on any laminate flooring. When cleaning laminate flooring, always ensure where a mop is used that it is well wrung out.

Apply Flooring Joint Sealer along all edges of planks when laying

### Laminate Flooring Accessories

Flooring underlay is essential for use with a floating floor. It provides a cushion for the flooring to sit on and will provide thermal insulation and reduce the emission and transmission of sound.

#### Foam Underlay – SDH0900

Popular because it is easy to fit, it also has excellent thermal insulation. Foam Underlay can be used in conjunction with Damp Proof Membrane (SDH0910), Paintable Damp Proof Membrane (SDH0931) or Bitumen Moisture Barrier Paper (SDH0932). Sheets must be joined together using Multi-Purpose Tape (SDH0930).

#### High Performance Underlay (XPS) – SDH0909

This underlay has many benefits including excellent levelling properties, compression strength and impact noise reduction. It is also lightweight and easy to handle. It can be used in conjunction with Damp Proof Membrane (SDH0910), Paintable Damp Proof Membrane (SDH0931) or Bitumen Moisture Barrier Paper (SDH0932).

#### Bitumen Moisture Barrier Paper – SDH0932

Required when fitting laminate flooring on a timber based sub-floor. Use in conjunction with Bitumen Moisture Barrier Paper Tape (GAR0410).

#### Damp Proof Membrane – SDH0910

This can be used on stone or concrete sub-floors. Details of where and how to use Damp Proof Membrane can be found in the relevant flooring installation guidelines. Use in conjunction with Multi-Purpose Tape (SDH0930).

#### Paintable Damp Proof Membrane – SDH0931

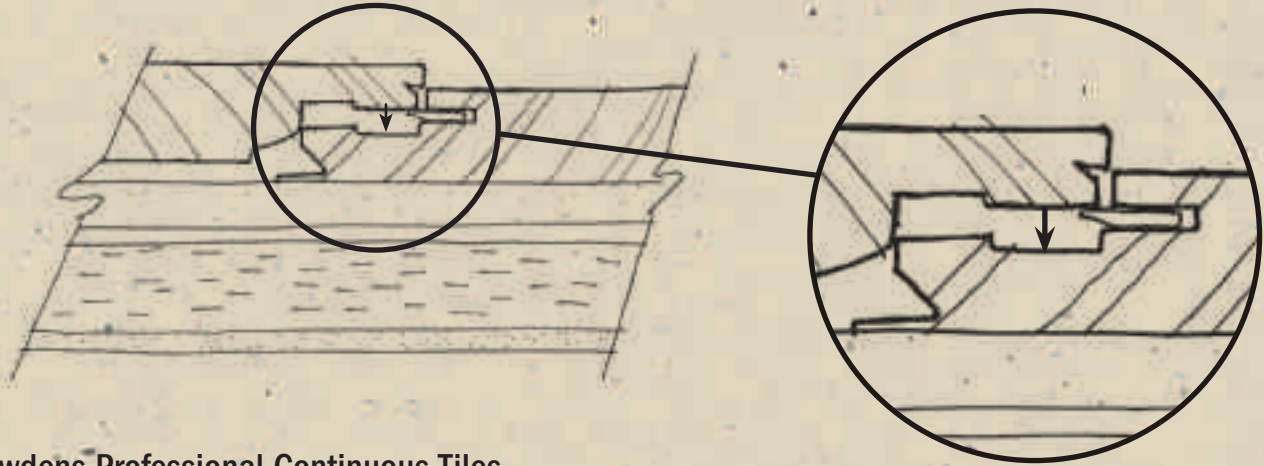

Is only suitable for use with laminate flooring on cement based sub-floors. Paintable Damp Proof Membrane is used as a moisture barrier on sub-floors when Damp Proof Membrane (SDH0910) is not suitable.

## Laminate Flooring

### Howdens Professional Fast Fit V Groove

Available in textured and registered embossed finishes, this premium laminate flooring has the natural, authentic look of real wood, enhanced by a four sided V groove.

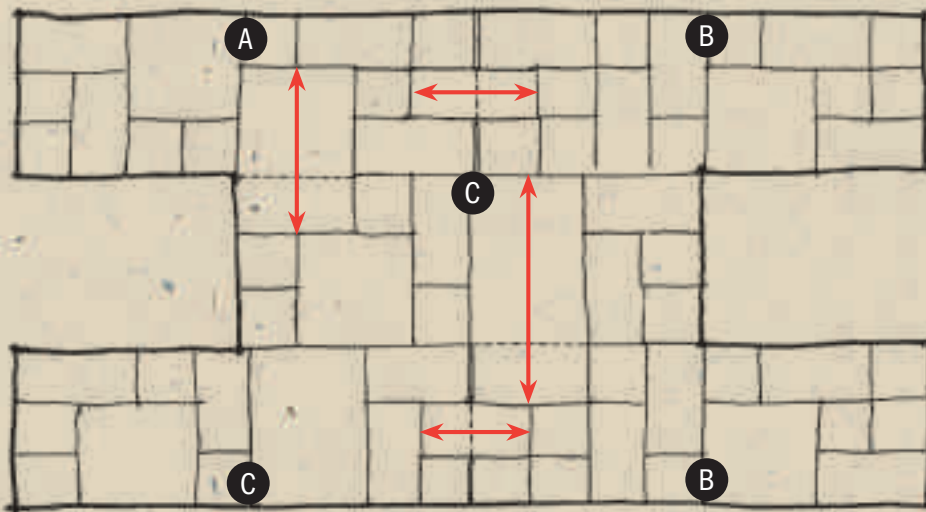

The quick fit, push down laminate flooring system increases fit speed by up to 30%. The flooring can be laid one piece at a time rather than row by row.

### Howdens Professional Continuous Tiles

Available in a choice of stone or slate finishes, Howdens Professional Continuous Tiles appear almost seamless, with a design that runs across various planks and a finished floor that looks very natural.

Planks are shown below as A, B, C. The arrows indicate the continuous tile effect across the planks.

## Flooring Accessories

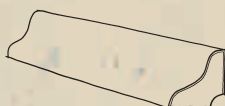

For a complete installation we offer a range of colour matched laminate and Solid Oak or Solid Bamboo accessories, as detailed below. For further information, please refer to individual product pages.

**L Section** - A finishing strip for use when flooring meets a vertical edge such as a fireplace or step.

**Threshold Strip** - A jointing profile used between 2 floors of the same height or for additional expansion in large areas (please refer to fitting instructions).

**Scotia** - In situations where skirting is not being replaced, a scotia can be used to cover the expansion gap between the flooring and the skirting.

**Ramp Strip** - A jointing profile used between 2 floors of different heights (please refer to fitting instructions).

Howdens Solid Oak Flooring

## Howdens Solid Oak Flooring

The natural beauty of oak is available in solid bevelled planks. Benefits include greater sound absorption over laminate flooring and warmth underfoot. Varying lengths within each pack create a traditional look. All planks are 18mm thick. Solid Oak flooring is lacquered to give it a polished finish.

15 Year Finish and Wear Guarantee

V Groove

Open Grain

Suitable for use in Kitchens & Living Areas

Fully Restorable

Note: Natural wood products may vary slightly in tone

Not suitable for use in bathrooms, conservatories or with underfloor heating. Flooring should be kept in the room where it will be laid for two weeks or more to allow it to acclimatise to the ambient temperature and humidity.

Suitable for use with Paintable Damp Proof Membrane and Bitumen Moisture Barrier Paper. Please refer to page 06 for more information.

Howdens Professional Random Effect Slate Tile

## Flooring Specifications

---

Please see below flooring specifications, providing an essential guide on how to buy flooring specific for your needs.

### Characteristics of Howdens flooring

#### V Groove

Planks have micro to deep bevelled edges to create a V Groove.

#### Continuous Pattern

Gives the appearance of a natural stone or slate floor with seamless joins.

#### Square Profile

Square profiled planks create a seamless look.

#### Random Pattern

Offers a realistic slate finish.

#### Open Grain

Replicates the look of solid wood flooring.

#### Suitable for use in Kitchens & Living Areas

Flooring can be laid in various rooms throughout the home.

#### 2 Strip

This 2 strip plank creates a feeling of space.

#### Suitable for use in Conservatories

Flooring is less sensitive to changes in temperature.

#### 3 Strip

This 3 strip plank creates a feeling of space.

#### Suitable for use with Underfloor Heating

See fitting instructions for maximum temperature.

#### 2 Tile

Provides an authentic look of real tiles.

#### Fully Restorable

Flooring can be restored to capture the finish and performance of the product when first installed. Real Wood flooring can be re-finished up to 3 times.

### Laminate Flooring Classification - Abrasion Classification (AC) Rating

---

The AC Rating tests the durability levels of laminate flooring.

Suitable for heavy domestic/light commercial use.

Suitable for medium commercial use.

Suitable for medium to heavy commercial use.

AC4 and AC5 laminates can be used for domestic use, however please be aware that as the ranking increases the roughness of the flooring also increases.

### Aqua Block Specifications

---

Aqua Block

The Aqua Block logo indicates that when joints are sealed using Flooring Joint Sealer (SDH0099), this flooring is suitable for use in bathrooms and other areas prone to high moisture levels (excluding wet rooms).

# Flooring Care & Maintenance Guide

## All flooring types

Care and regular maintenance/cleaning will ensure flooring lasts for many years. Below are some helpful tips to maintain flooring:

- Use a soft brush or vacuum cleaner to remove any surface dust. Do not use abrasive cleaners, steel wool or scouring pads, as they will damage the floor
- For regular cleaning use a cloth, ensuring it is well wrung. It is important not to apply excess moisture to the floor
- Do not use steam mops/cleaners
- We recommend the use of felt pads under furniture to protect the floor. Moveable furniture/chairs should be on soft castors or placed on a plastic mat. Any single piece of furniture placed on the floor should not exceed 115kgs in weight
- Door mats should be used inside and outside all external doorways to prevent grit from being carried across flooring, to protect surfaces from excessive wear and tear

## Re-lacquering of Solid & Real Wood flooring

Over time, the lacquered surface of Solid and Real Wood flooring will wear. When this happens, flooring can be restored in order to capture the finish and performance of the product when first installed.

We recommend that Real Wood flooring is not re-finished more than 3 times.

### 1. Surface Preparation

Remove the existing layer of varnish with a disk sander and extract/clear any dust

### 2. Finishing

Finish with suitable flooring varnish/lacquer. Always follow the varnish/lacquer manufacturer's instructions. We recommend testing the finish on a hidden area or off cut, before applying to the full floor

Howdens Professional Continuous Natural Stone Tile

Howdens Professional Tudor Oak

## Flooring Accessories & Tools

Howdens supplies a variety of flooring accessories and tools for a professionally fitted floor. The right underlay is essential for use with floating floors. It provides thermal insulation and reduces the transmission of sound. A damp proof membrane can be used on stone or concrete based sub-floors before laying the underlay. Use flooring spacers around the edge of the floor to allow a gap for expansion and contraction, colour matched scotias can then be used to cover the gaps left around the edge.

### Underlay & Moisture Barrier

**Foam Underlay** 1m x 15m x 2mm **UK** SDH0900  
**Multi-Purpose Tape** 50m x 50mm SDH0930  
 Suitable for use with Howdens Real Wood flooring and Howdens Laminate flooring

# The Complete Howdens Collection

Howdens Joinery offers a range of integrated kitchen and joinery products designed to meet the needs of modern living. Our offer includes over 40 different kitchen designs, plus a full range of accessories, worktops, sinks, taps, doors, flooring, skirting and a wide variety of Lamona appliances exclusive to Howdens.

We are a trade only business that has been selling to trade professionals since 1995. Given the complexity of the modern kitchen we believe that only experienced, qualified builders and joiners should install our products.

- We offer you the reassurance that Howdens is a market leader. Last year we supplied over 350,000 kitchens to UK homes.
- There are over 580 Howdens depots nationwide so it's likely we are local to you. And because we are local, your builder can collect exactly what he needs, when he needs it, to install your dream kitchen.
- Each of our depots has experienced designers who will plan your kitchen and be on hand throughout to help you and your builder.

For more information, please request any of the following brochures from your local builder or visit [www.howdens.com](http://www.howdens.com)
